- Junior Network Technician
- Cybersecurity fundamentals
- CCEP and CNSP

LANGUAGES

- English (Fluent)
- Amharic (fluent)
- Afan Oromo (native)

PROFILE

I am Henok Girma, an Electrical and Computer Engineering graduate and ISO 27001 certified professional with a deep passion for technology, networking, cybersecurity, and web development. I have hands-on experience in UI/UX design, full-stack development, IT support, and cybersecurity, and I am currently pursuing advanced certifications from Cisco and Cybrary to enhance my technical expertise. I have contributed to multiple impactful projects, including Wefekomech Web App, a mentorship, garage, and incubation platform supporting entrepreneurs and innovators; EasyGate, a Telegram bot with a companion web app that automates services and manages users; and a digital energy meter system for Ethiopian Electric Utility, integrating hardware and software to allow users to monitor electricity consumption.

Currently, I work at ZsecuredTech Trading PLC as a junior cybersecurity and ISO consultant, where I focus on implementing cybersecurity measures, practicing ISO 27001 auditing, and providing IT solutions. I am highly motivated to combine my technical skills, project experience, and ISO knowledge to grow as a professional cybersecurity and ISO consultant, delivering efficient, secure, and user-friendly technology solutions.

WORK EXPERIENCE

Zsecuredtech - Cybersecurity Consultant & ISO Auditor (Trainee)

- Worked as a Cybersecurity Consultant and ISO Implementation Trainee at Zsecuredtech, supporting organizations in building stronger information security and compliance frameworks. I actively contributed to ISO/IEC 27001:2022 implementation projects, including policy development, risk assessment, internal audits, and preparation for certification. I was also involved in the integrated ISO initiative at Gadaa Bank, assisting in the alignment of both ISO 9001:2015 and ISO 27001:2022 requirements. This role strengthened my skills in cybersecurity governance, documentation development, and management system implementation while applying the knowledge gained from my professional certifications.

Bank of Abyssinia GRC analyst

2024

- Worked as a Governance, Risk, and Compliance (GRC) specialist at Bank of Abyssinia, where I contributed to strengthening the bank's information security and regulatory compliance framework. I was involved in assessing operational and cybersecurity risks, reviewing internal policies, and ensuring alignment with national banking regulations and international standards. This experience enhanced my understanding of risk management, compliance monitoring, and cybersecurity governance within the financial sector.

Wefekomech web app and Digital Energy Meter & Fanos App Learning experience designer (LXD) and developer

2024 - 2025

- Worked on key software development projects including the Wefekomech Web App, a mentorship and incubation platform, and the Digital Energy Meter & Fanos App for Ethiopian Electric Utility. Focused on UI/UX design, front-end development, and integrating software with hardware systems.
